1 Sequence 63, Application US/10354240

2 Publication No. US20030185847A1

3 GENERAL INFORMATION:

APPLICANT: Sone, Toshio

APPLICANT: Kame, Akinori

APPLICANT: Name, Akinori

APPLICANT: Wame, Akinori

PRIOR APPLICANT: Peptide-Based Immunotherapeutic Agent for Treating Allergic Disea

FILE REFERENCE: SPO-103D1

CURRENT PILING DATE: 2003-01-29

PRIOR APPLICATION NUMBER: DCT/JP97/00740

PRIOR APPLICATION NUMBER: US 09/142,524

PRIOR APPLICATION NUMBER: US 09/142,524

PRIOR APPLICATION NUMBER: US 09/142,524

PRIOR APPLICANT: Patentin version 3.1

SEQ ID NO 63

LENGTH: BATURE:

CORATION: (1). (15)

COTHER INFORMATION: Cryjl peptide, Figure 1, Row 49

US-10-354-240-63

APPLICANT: Rogers, Bruce
APPLICANT: Ripper, David G.
APPLICANT: Rafnar, Thorunn
APPLICANT: Ruo, Mei-chang
TITLE OF INVENTION: Allergenic Proteins From Ragweed and Uses
NUMBER OF SEQUENCES: 93
CORRESPONDENCE ADDRESS:
ADDRESSEE: LAHIVE & COCKFIELD
STREET: 60 State Street, suite 510
APPLICANT: Brauer, Andrew;
APPLICANT: Exley, Mark A.;
APPLICANT: Exley, Mark A.;
AIPLICANT: Powers, Steven P.
AITLE OF INVENTION: Allergenic Proteins And Peptides From TITLE OF INVENTION: Japanese Cedar Pollen
NUMBER OF SEQUENCES: 261
CORRESPONDENCE ADDRESS:
ADDRESSEE: ImmuLogic Pharmaceutical Corporation, Inc. STREET: 610 Lincoln St.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Query Match 46.5%; Score 53; DB 3; Length 20; Best Local Similarity 100.0%; Pred. Patent No. 609086

GENERAL INFORMATION:

APPLICANT: POILOCK, Joanne;

APPLICANT: Garman, Richard D;

APPLICANT: Garman, Richard D;

APPLICANT: Wo. Mei-Chang;

APPLICANT: Evaley, Mark A;

APPLICANT: Powers, Steven B.

TITLE OF INVENTION: Japanese Cedar Pollen

NUMBER OF SOURENCES: 261

APPLICANT: Waltham

STREET: 610 Lincoln St

COMPURE: Waltham

STREET: Ploppy disk

COMPURE: Elb PC Compatible

COMPUTE: Relabable FORM:

MEDIUM TYPE: Floppy disk

COMPUTE: Relabable FORM:

MEDIUM TYPE: Ploppy disk

COMPUTE: Relabable FORM:

COMPUTE: Relabable FORM:

MEDIUM TYPE: Ploppy disk

COMPUTE: Relabable FORM:

COMPUTE: Betentin Relabable #1.0, Version #1.25

CLASSIFICATION DATA:

APPLICATION NUMBER: US/08/467,023

CLASSIFICATION NUMBER: 08/350,225

FILING DATE: December 6, 1995

CLASSIFICATION NUMBER: 08/350,225

FILING DATE: December 6, 1995

CLASSIFICATION NUMBER: 08/350,225

FILING DATE: BREATHIARD

NAME: Jane R. Remillard

NEBERRUCE/OCKET NUMBER: 025.6 USD2 (IMI-028CPD2)

TELECOMMUNICATION NUMBER: 025.6

SEGUENCE CHAAACTERISTICS:

LENGTH: 20 amino acids

TYPE AMINO ACID TYPE: Poppide

TYPE AMINO ACID TYPE: Poppide

TYPE AMINO ACID TYPE: Poppide

NOBCOLETYPE: Depende

SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/467,023
FILING DATE: June 6, 1995
CLASSIFICATION: 424
PRIOR APPLICATION NUMBER: 08/350,225
FILING DATE: December 6, 1994
ATTONNEY/AGENT INPORMATION:
NAME: Jane E. Remillard
REGISTRATION NUMBER: 38,872
REFRENCE/DOCKET NUMBER: 025.6 USD2 (IMI-028CPD2)
TELECOMMUNICATION INFORMATION:
TELEPAK: (617) 227-7400
TELEPAK: (617) 227-5941
INFORMATION FOR EQUID NO: 51:
SEQUENCE CRARACTERISTICS:
LENGTH: 20 maino acids
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    025.6 USD2 (IMI-028CPD2)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ; LOCATION: (1). Patent No. 575994

GENERAL INFORMATION:

APPLICANT: COUGHLIN, SHAUN R.

APPLICANT: SCARBOROUGH, ROBERT M.

TITLE OF INVENTION: RECOMBINANT THROMBIN RECEPTOR AND TITLE OF INVENTION: RELATED PHARMACEUTICALS

NUMBER OF SEQUENCES: 223

CORRESPONDENCE ADDRESS:

ADDRESSEE: MORRISON & FOERSTER

STREET: 2000 Pennsylvania Ave., NW

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                 (without alignments)
